SUMMARY

Third-year Management Information Systems student with professional React development experience gained through volunteer work with a government agency. Skilled in .NET platform and familiar with Spring ecosystem, with strong foundation in object-oriented programming and business-technology integration. Proven ability to work in structured development environments and collaborate effectively with supervisors to deliver solutions. Seeking to apply development experience and technical skills as a Java Developer Intern.

TECHNICAL SKILLS

C# (ASP.NET Core)	HTML, CSS, Javascript, Typescript	SQL (SQL Server, Postgres)
Java (Spring Framework)	React, Next Js	Database Design
REST API	Maven	Redis
Agile	Postman, Insomnia	GIT (Github, Gitlab)

PROFESSIONAL EXPERIENCE

Staff Management System, Ministry Of Interior (Volunteer) May 2025 - Present

- Diagnosed and resolved bugs in each component with attention to detail.
- Refactored legacy React components to improve readability, reusability, and performance.
- Implemented new features based on evolving business logic and user requirements.
- Collaborated with my supervisor to ensure we met end user requirements.

POS Sytem, Freelance Apr 2025 - May 2025

- Developed a PWA-enabled POS system which feels like a native mobile app.
- real-time currency conversion (USD, KHR, THB) which help with user experience
- Integrated direct receipt printing from web interface and Cloudinary for asset management, reducing cost, image load times, and improving user experience.
- Adapted quickly to evolving client requirements
