SUMMARY

Third-year Management Information Systems student with **professional React** development experience gained through volunteer work with a government agency. Skilled in **.NET** platform with strong foundation in object-oriented programming and business-technology integration. Proven ability to work in structured development environments and collaborate effectively with supervisors to deliver solutions. Seeking to apply development experience and technical skills as a C# Developer.

TECHNICAL SKILLS

C# (ASP.NET Core)	REST API	Git/Github
Entity Framework Core	Redis	Agile
ADO.NET Core	React	Postman, Insomnia
SQL (SQL Server)	HTML, CSS, Javascript, Typescript	

PROFESSIONAL EXPERIENCE

Staff Management System, Ministry Of Interior (Volunteer) May 2025 - Present

- Diagnosed and resolved bugs that cause the application to hit the API rate limit.
- Refactored legacy React components to improve readability, reusability, and performance by 15%.
- Implemented new features based on evolving business logic and user requirements.
- Collaborated with my supervisor to ensure we met end user requirements.

POS Sytem, Freelance Apr 2025 - May 2025

- Developed a PWA-enabled POS system which feels like a native mobile app.
- Real-time currency conversion (USD, KHR, THB) which help with user experience
- Integrated direct receipt printing from web interface and Cloudinary for asset management, cost reduction, and image load times by 30%.
- Adapted quickly to evolving client requirements
